
Travel Bucket List Project

By Yana Z

Planning

- Paraphrasing the project's brief and writing it down
- Proto-personas, user needs
- Wireframes != Sitemap
- Files/folders structure and order of creating them
(“what does what“ and “what's connected to what”)

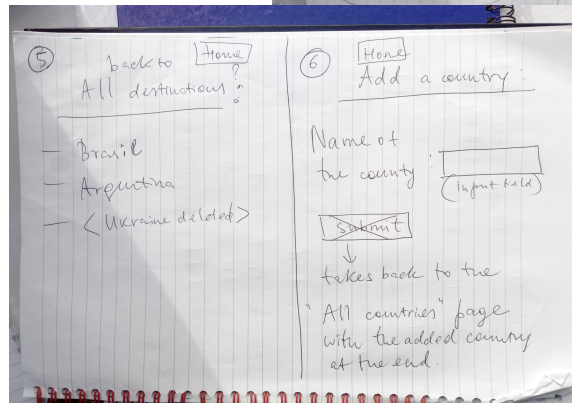

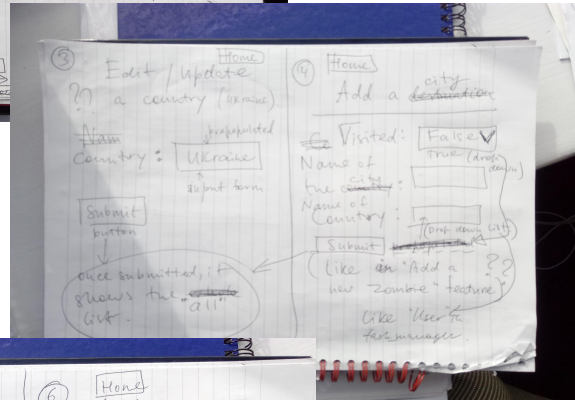

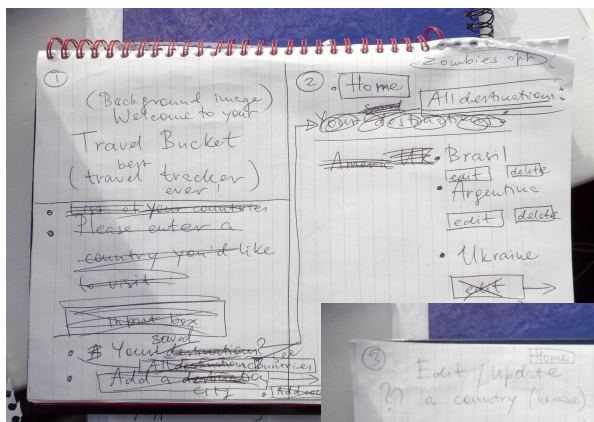

Travel Buckets app content:

App should have:

- Countries (where user can):
 - 1) create ✓
 - 2) edit ?? *
- Cities:
 - 1) should be inside countries? How?
 - 2) 1-2 in each country ✓
 - 3) user can:
 - a) create
 - b) delete
 - 4) cities can be marked as "visited" or "still to see".
- Search feature ??

Analogy:
 Like Zombie Types: countries?
 Like Zombies: cities?
 but visited from "Tasks"

Protopersona 1 (Used <https://xtensio.com/user-persona/>)

Jenny Jenkinson

Behaviors

- PLANS AHEAD
- PREFERS EASY TO USE TECHNOLOGY

- Location: Glasgow

SITEMAP

SHOW TIME

Challenges and Learning points

- Planning well - helps and not planning - doesn't
- Don't waste time trying to copy, create your own
- Asking questions helps A LOT :)

QUESTIONS?
